**DETAILED ACTION**

***Response to Amendments and Arguments***

1. Claim 1 is pending.  
Claim 1 has been amended.  
Claim 1 is examined on the merits.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Withdrawn Rejection***

***Claim Rejections - 35 USC § 112***

4. The rejection of claim 1 under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement is withdrawn. Claims 2-5 have been cancelled.

***New Grounds of Rejection***

***Claim Rejections - 35 USC § 112***

5. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
  - a. Claim 1 is vague and indefinite in the recitation "determining levels of a colon specific gene (CSG)". It is unclear how the level of the gene is measured. What seems to be the claimed invention is the detection of a polynucleotide sequence

Art Unit: 1642

comprising SEQ ID NO: 1 and the corresponding polypeptide. Applicants are advised to clearly and distinctly limit the claim language to the claimed invention.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 09/700,769 (filed January 4, 2001). Although the conflicting claims are not identical, they are not patentably distinct from each other because both read on determining or measuring levels of CSG in a sample of cells, tissue or bodily fluid in order to assess the presence of colon cancer. While the instant application, 09/618,596 specifies that the CSG comprises a polynucleotide sequence of SEQ ID NO: 1 or the encoded polypeptide the broad claim of application '769 encompasses any CSG. The method of application '769 utilizing the broadly termed CSG includes a plethora of molecules and intrinsically reads on the instant application. This is a provisional

Art Unit: 1642

obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
